

EPC Project

Client: ADNOC Sour Gas

Project Name: Maximum Production

Scope of Work:

- Design and detailed engineering
- Procurement of structural/piping material as per the engineering specs
- Shop fabrication as per the drawings (over 8000 DI of high schedule piping)
- Stringent NDT requirements involving 100% RT of well joints and we achieved over 96% success rate
- Construction and commissioning
- Insulation and site installation works in Red Zone (highest H2S risk)
- Critical lifts were involved including valve to be installed at high locations
- Installation of F&G systems along with E&I works
